

MOHAMADHASAN TABRIZI

Back-End / Full-Stack Software Engineer

 github.com/mohamadhasan1992  linkedin.com/in/mohamadhasan-tabrizi  tabrizi.mohamadhasan@yahoo.com

SUMMARY

Back-End/Full-Stack Engineer with 8+ years of experience designing and shipping scalable Node.js (NestJS) services, real-time systems, and full-stack web applications. Skilled in Clean Architecture, DDD, CQRS, and microservices, with a track record of measurable improvements in performance, reliability, and reduced coupling in production systems. M.Sc. in Cryptography & Secure Communications with a strong foundation in security-by-design.

SKILLS

Languages: JavaScript, TypeScript, Python

Backend: NestJS, Express, FastAPI

Frontend: React, Next.js, Redux, Zustand, React Query

UI Libraries: Tailwind CSS, Material UI, Chakra UI, Bootstrap

Databases: MongoDB (Mongoose), PostgreSQL (TypeORM), Redis

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS S3, NGINX, Cloudflare

Messaging & Real-Time: RabbitMQ, Redis Streams, WebSocket (Socket.IO), Firebase Cloud Messaging

Architecture: Clean Architecture, Domain-Driven Design, CQRS, Microservices, Event-Driven, SOA

Monitoring & Observability: Prometheus, Grafana, ELK Stack, APM

Other Tools: Swagger/OpenAPI, TUS Protocol, Third-Party API Integration, MediaMTX, ThingsBoard, Test-Driven Development

EXPERIENCE

JP-Droni SRL

2024 – 2026

Back-End Developer - jpdroni.it

Italy

- Developed and maintained a NestJS monorepo backend for analyzing drone-captured images and telemetry data, using service-oriented design to keep modules independently deployable
- Built a Python microservice hosting multiple models and algorithms, receiving processing events
- Built scalable services on MongoDB, Redis, and RabbitMQ to support efficient, reliable inter-service communication
- Implemented large file uploads and resumable data transfers using AWS S3 and the TUS protocol
- Delivered real-time video streaming of drone footage to the frontend using MediaMTX
- Set up CI/CD pipelines with GitHub Actions to automate testing, building, and deployment
- Containerized services with Docker and configured NGINX + Cloudflare for reverse proxy, security, and performance
- Integrated the ELK stack (with Filebeat) and Prometheus + Grafana for centralized logging, monitoring, and alerting

NEOM-IT

2022 – 2024

Backend & Full-Stack Developer

Netherlands

Huden.nl

- Built a NestJS application following CQRS, Clean Architecture, and DDD principles, improving performance by 30% through read/write database separation
- Integrated the Meta WhatsApp Business API and a Telegram bot to deliver real-time property alert notifications
- Standardized deployments across environments using Docker and Docker Compose

Sebuda.com

- Adopted a Service-Oriented Architecture (SOA), improving responsiveness and scalability by 30%
- Implemented RabbitMQ for asynchronous inter-service communication, reducing coupling and increasing reliability

- Built real-time notifications with Firebase Cloud Messaging (FCM) and a live chat system using Socket.IO
- Integrated third-party APIs (Facebook, YouTube, TikTok, X) to streamline account listing and verification workflows
- Set up the ELK stack for centralized logging and performance monitoring

Rayan Softland
Full-Stack Developer

2021 – 2022
Tabriz, Iran

- Engineered a marketplace platform connecting 500+ suppliers, architects, and engineers, reducing lead times by 40%
- Developed RESTful APIs using Test-Driven Development, cutting error rates by 25%
- Designed a role- and location-based access control system, doubling authorization granularity
- Built a React management dashboard with 30+ features for data visualization and document management

MelkeTabriz
Full-Stack Developer

2020 – 2021
Tabriz, Iran

- Designed and optimized a streamlined RESTful API, reducing response times by 30%
- Built a configurable form generator, cutting development and maintenance effort by over 70%
- Delivered a React-based CRM dashboard with 30+ features for document management, HR, and accounting

Freelance
Full-Stack Developer

2018 – 2020
Tabriz, Iran

- **Bursiness:** Built an application for traders to log transactions and generate weekly/monthly profit-and-loss reports

PROJECTS

English Tutor | *React, NestJS, Socket.io, Ollama (Qwen), TTS, STT*

Aug. 2025

- Built a personal AI-powered English speaking practice app where users send voice messages and receive real-time conversational feedback
- Implemented speech-to-text and text-to-speech pipelines to enable natural voice-based interaction with the AI
- Ran the Qwen model locally via Ollama for grammar correction and conversational responses
- Built the backend with NestJS and the frontend with React for a smooth full-stack experience

EDUCATION

Shahid Beheshti University (SBU)
M.Sc. in Cryptography & Secure Communications

2016 – 2019
GPA: 16.72/20

- Thesis: *Introducing a Privacy-Preserving Access Control Model for Healthcare* – Grade: 20/20

COURSEWORK

Relevant Courses: Cryptography & Algorithms, Computer Networks, Discrete Mathematics, Linear Algebra, Calculus, Probability & Statistics

HOBBIES

Azerbaijani Dancer
Performing Azerbaijani traditional dance

2020 – Present

PlayStation Gaming
Story-driven and competitive titles

Lifelong hobby
